VOLUME 22, PARTS 1 - 5, 1969

Communications 497 - 535

Abbreviated title in the 'World List of Scientific Periodicals':

J. Rubb. Res. Inst. Malaya

Printed at Art Printing Works, Kuala Lumpur, Malaysia

CONTENTS OF VOLUME 22

PART 1

	Communication	Page
Consumer Appraisals of Natural Rubber. *N. P. Bekema* ...	497	1
New Presentation Processes and SMR Scheme. *D. J. Graham* ...	498	14
Uniformity and Processability of New Type Natural Rubbers. *M. Pike and J. Ramage*	499	26
Heveacrumb Process. *J. E. Morris*	500	39
Viscosity-stabilised Heveacrumb. *Chin Peng Sung*	501	56
Five Years of Nat-Rubbers. *P. R. Gyss and M. Fleurot* ...	502	70
Recent Aspects of Block Natural Rubber Production by Mechanical Methods. *M. G. Smith*	503	78
Screw Press—Heart of an Integrated Cleaning and Drying Plant for Natural Rubber. *R. Kent Slaby*	504	87
Oil Extension of Natural Rubber at Latex Stage. *Chin Peng Sung and J. O'Connell*	505	91
Improved Ageing of Natural Rubber by Chemical Treatments. *A. A. Watson*	506	104
Studies on the Curing Characteristics of Natural Rubber. *H. W. Greensmith and A. A. Watson*	507	120
Effect of Physical Degradative Agencies on Some Molecular Parameters of Natural Rubber. *Sekaran Nair*	508	135

PART 2

Natural Rubber in Tyres. *K. A. Grosch*	509	145
Natural Rubber and its Traditional Use in Underground Pipe Sealing Rings. *P. B. Dickenson*	510	165
Developments in the Use of Natural Rubber as an Engineering Material. *P. B. Lindley and A. R. Payne*	511	176
Some Factors Affecting the Service Life of Natural Rubber Articles. *C. J. Derham, G. J. Lake and A. G. Thomas*	512	191
Recent Research in Polymer Chemistry. *C. G. Overberger* ...	513	201

	Communication	Page
Symbiotic Relations Between Natural and Synthetic Rubber. *James D. D'Ianni*	514	214
Comparative Properties of Natural Rubber and Synthetic *Cis*-Polyisoprene. *G. M. Bristow, J. M. Campbell and E. D. Farlie*	515	225
Homogeneity of Natural and Synthetic Rubber Compositions. *C. E. Scott, J. E. Callan and W. M. Hess*	516	242
PART 3		
Materials in Relation to Rubber Factory Developments. *W. F. Watson*	517	265
NR Vulcanisates with Improved Dynamic Properties. *A. R. Payne, P. M. Swift and M. A. Wheelans*	518	275
Development of Network-bound Anti-Oxidants for Improved Ageing of Natural Rubber. *M. E. Cain, G. T. Knight, P. M. Lewis and B. Saville*	519	289
Occurrence and Prevention of Changes in Chemical Structure of Natural Rubber Tyre Tread Vulcanisates during Service. *J. I. Cunneen and R. M. Russell*	520	300
Creep of 'Pure-Gum' Vulcanisates of Natural Rubber. *Lawrence A. Wood*	521	309
New Concepts in Vulcanisation of Natural Rubber. *C. S. L. Baker, D. Barnard and M. Porter*	522	317
Delayed Elasticity of 'Pure-Gum' Rubber Vulcanisates. *R. Chasset and P. Thirion*	523	331
Studies on Thiazole-accelerated Sulphur Vulcanisation of Rubber. *Sant K. Bhatnagar and S. Banerjee*	524	343
Structural Requirements for NR Vulcanisates with Improved Flex Resistance after ageing. *E. B. McCall*	525	354
PART 4		
A Simple Screening Test for Anti-Oxidants. *G. S. Whitby* ...	526	363
Estimation of Certain Carbon Black-loaded Natural Rubber Vulcanisate Properties by Physico-Chemical Methods. *Carl W. Snow*	527	375
Morphology of Aggregates: Particle Size and 'Structure' of Carbon Black from Electron Micrographs. *A. I. Medalia, F. A. Heckman and D. F. Harling*	528	381

	Communication	Page
Determination of Dry Rubber Content of *Hevea Brasiliensis* by Latex Film Dialysis. *Sumarno Kartowardojo*	529	389
Use of Monsanto Rheometer for Quality Control of Raw and Compounded Natural Rubber. *D. G. Lloyd*	530	399
PART 5		
Freeze-resistant Natural Rubber Latex Concentrate. *E. G. Cockbain, J. Gregory, N. M. Pillai and A. D. T. Gorton*	531	409
Use of Natural Rubber Latex in Paints. *M. Nadarajah and S. Ganeshasundaram*	532	423
Use of Natural Rubber Latex in Road Construction. *M. J. Fernando and M. Nadarajah*	533	430
Compounding Natural Rubber Latex for Improved Performance. *M. W. Philpott*	534	441
Degradative Changes in Ammoniated Latex: Effect at Onset Shown by High Speed Centrifugation. *C. S. Krishnaswamy* ...	535	450
